About ILM

Integrated Learning Modules, LLC (ILM), introduces ILM Software, a way to easily integrate all of your school-based technology into one platform. ILM Software is ideal for virtual, blended, and in-person learning.

We provide a high-quality video-conferencing module with pre-prepared lesson plans in over 100+ languages, an interactive chalkboard, quiz materials, and engaging simulations to create meaningful learning experiences for students from anywhere and any device and to allow educators to optimize their time.

**PREPARED
LESSON PLANS**

**INTERACTIVE
CHALKBOARD**

**HIGH-QUALITY
VIDEO-CONFERENCE-
ENCING MODULE**

**EXCEPTIONAL
LESSONS IN
OVER 100+
LANGUAGES**

**QUIZ MATERIALS
WITH ENGAGING
SIMULATIONS**

The platform has a teacher-supervised environment that monitors student attendance and screen views during class, which increases student engagement.

The platform is affordable for schools and compatible with multiple school management software like PowerSchool.

ILM software is an evolving platform driven by constant educator feedback.

We work closely with the needs of schools to deliver lessons efficiently, hence improving student outcomes.

Why ILM?

Over the past year, the transition to remote/hybrid learning has been a challenge.

One obstacle many educators are dealing with is balancing different tech tools and software that require a substantial amount of time and effort to familiarize themselves with.

At ILM, we provide a solution by bringing all the essential and academic technological resources under one platform. As a result, educators can focus on student progress and cultivate meaningful student-teacher relationships.

1

Streamlined Teaching, Learning, and Communication

- Allows teachers and students to access all their lessons and teaching resources under one screen.
- Integrates with academic/management software like PowerSchool.
- Individualized dashboard view for each student and teacher with summary and details of classes, lessons, announcements, homework, exams, and grades.
- Students can raise their hands digitally to alert the teacher without disturbing others.

Interactive Chalkboard, Materials, Lectures, Videos, and Simulations

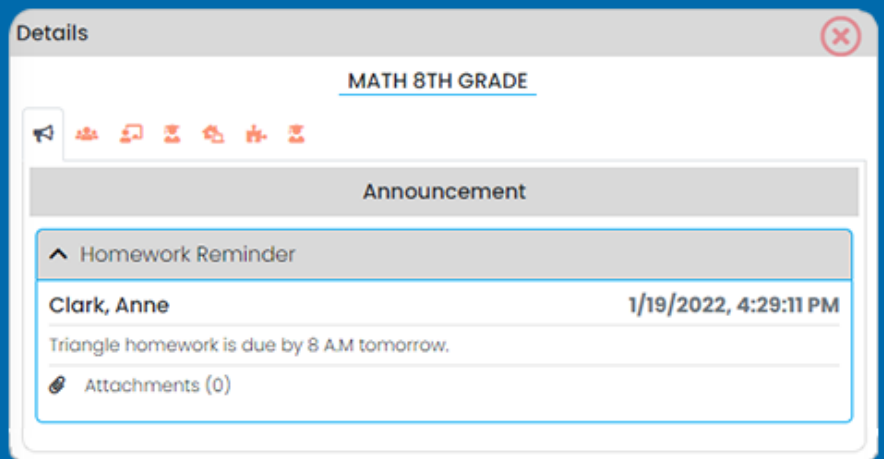

- A synchronized interactive whiteboard allows every student to participate. The work of each student is distinctively labeled and can be seen if hovered over it.
- Easy classroom management tools for teachers with different tabs and pages while the student's screen view changes simultaneously if the educator chooses.
- Using the 'Lock' and 'Un-lock' features, educators can permit students to browse through the tabs and navigate independently.
- Access thousands of pre-loaded lesson materials, topics, and questions for quizzes or pre-prepared lessons on each topic for ease and efficiency. A teacher can also upload their own materials and questions.
- Interactive simulations offer dynamic examples to help students better comprehend the curriculum subject.

3

Customizations that work for your school

- Choose from our lesson plans or upload your own.
- Assign homework and quizzes and keep track of students' grades.
- Effective communication between educators and students by posting Announcements.
- Add multiple teachers as co-admin.
- Mute and ping students during a classroom.
- Access to live results such as quizzes, homework, and exams while in progress.
- Monitor and record each student's attendance as they enter and exit the classroom. Educators are notified even if the browser is changed on a student's screen during an on-going class.
